SUMMARY

Game development student specializing in Unreal Engine with strong experience in building gameplay systems, multiplayer mechanics, and scalable architectures. Proven ability to lead programming teams and develop core systems including movement, combat, AI, and networking. Particularly interested in tools development and improving workflows for efficient game production.

EXPERIENCE

Lead Programmer – Nythe

X-Quick Software | 2025 – Present

- Led programming for a 15-person team on a dark fantasy movement-based shooter
- Designed and implemented core gameplay systems including FPS movement (dash, slide, wall-run) and combat mechanics
- Built AI systems using Behavior Trees for enemy interactions
- Developed a modular weapon system using Data Assets for scalability
- Integrated animation systems, VFX pipelines, and gameplay systems into a cohesive experience
- Coordinated technical implementation across multiple disciplines

Lead Programmer – Daydream

Echo Garden Studios | 2025 – Present

- Led programming for a 5-person team developing a co-op multiplayer experience
- Implemented multiplayer systems using Steam Advanced Sessions
- Handled full network replication of gameplay systems

- Solved complex issues adapting single-player systems to multiplayer environments
- Built a replicated animation montage system with server-time synchronization to eliminate desync between clients
- Developed gameplay systems including puzzles, inventory, AI, interaction, and movement

EDUCATION

HBO Bachelors Creative Media and Game Technologies

Hanze University of Applied Sciences – Groningen, Netherlands
2024 – 2028

BSc Computer Science and Engineering (2 Years Completed)

North South University

SKILLS

Unreal Engine - Advanced

Blueprint Systems - Advanced

AI (Behavior Trees) - Advanced

Networking / Replication - Intermediate

Photoshop - Intermediate

Unity Engine - Intermediate

UI (UMG) - Intermediate

Git / Version Control - Intermediate

C++ - Basic

C# - Basic

C - Basic

Game Maker - Basic

PROJECT FOCUS

- Gameplay Systems Architecture
- Multiplayer Systems & Replication
- AI Behavior Design
- Modular & Data-Driven Systems
- Movement-Based Combat Design
